SUMMARY

B.Sc. Mathematics student (2027) who builds full-stack MERN applications with secure authentication, payment integration, admin tooling and automation. Seeking a Full Stack / Backend Developer role to build and ship production features.

TECHNICAL SKILLS

Languages: JavaScript (ES6+)
Frontend: React, HTML5, CSS3
Backend: Node.js, Express.js, REST APIs, JWT Authentication, Middleware, Rate Limiting, node-cron
Databases: MongoDB (Mongoose, Aggregation Pipelines, Transactions, Population, Projection), Firebase
Integrations: Razorpay, Telegram Bot API (Telegraf), Cloudinary, Email (OTP) services
Tools: Git, GitHub, Postman, Vercel

PROJECTS

Full Stack E-Commerce Platform | MERN, Razorpay, Telegram Bot Live | GitHub

- Built secure authentication: short-lived JWT access tokens with httpOnly-cookie refresh tokens stored as SHA-256 hashes, token rotation with reuse detection, bcrypt password hashing, email OTP verification, password reset and role-based admin access.
- Integrated Razorpay: server-side order creation, HMAC signature verification and webhook handling for captured and failed payments, with idempotency checks to avoid duplicate processing.
- Prevented overselling using MongoDB transactions with atomic conditional stock updates; added a 15-minute stock reservation that a node-cron job releases for unpaid orders.
- Developed an admin panel (products, orders, users, dashboard) with aggregation pipelines ($match, $group, $lookup, $addFields) for revenue and per-user order statistics, with pagination.
- Built a Telegram bot (Telegraf) that sends admins new-order and low-stock alerts and an on-demand daily sales report via aggregation, restricted to the admin's chat ID.
- Hardened the API with route-wise rate limiting (express-rate-limit), Helmet, CORS whitelist and request validation; handled image uploads with Multer and Cloudinary.

React E-Commerce Store | React, Firebase, EmailJS Live | GitHub

- Built a React storefront with Firebase authentication and database, skeleton loading states and EmailJS order notifications.

Other Projects: Expense Tracker (React), Grocery Store (HTML, CSS, JS, WhatsApp checkout), Password Generator (React), Tic Tac Toe (JavaScript, animations and sound).

EDUCATION

B.Sc. Mathematics, Rani Durgawati Vishwavidyalaya, Jabalpur Expected 2027
